

## Fenstanton & Hilton Primary School

At our school we deliver science lessons following these principles:

- F**un
- E**veryday Life
- k** **N**owledge
- H**ands on
- I**nvestigations
- L**earning indoors and out

Staff, children, parents and Governors all shared their views about good science lessons at our school. We want all children to develop a passion for STEM (Science, Technology, Engineering, Maths) subjects. By following these principles and enriching the curriculum with trips, visitors, science days, homework challenges and clubs we are inspiring our children and influencing their future life choices.
